

## ***From the CCRC Business Center***

### ***Ages & Stages Questionnaire***

The parent-completed Ages & Stages Questionnaires®, Third Edition (ASQ-3™) is the most accurate, family-friendly way to screen children for developmental delays between one month and 5½ years, without any gaps between the questionnaire age intervals. The use of ASQ-3's questions on behavior and communication also help elicit parent concerns that may point to autism or other issues.

#### ***ASQ: 3 at a Glance***

Make the most of your time and your screening dollars with user-friendly options for data management and online questionnaire completion. You'll save time through streamlined data management processes, eliminate the cost of photocopying and mailing questionnaires, and ensure accuracy with automated scoring and questionnaire selection.

Whether you're a home provider, child care center director, or other early childhood professional, there's a web-based or other ASQ solution that will help your program save time and ensure accurate ASQ implementation:

ASQ-3 questionnaires:

- Are available in English or Spanish
- Take just 10–15 minutes for parents to complete and 2–3 minutes for professionals to score
- Capture parents' in-depth knowledge
- Highlight a child's strengths as well as concerns
- Teach parents about child development and their own child's skills
- Highlight results that fall in a "monitoring zone," to make it easier to keep track of children at risk
- Can be completed at home, in a waiting room, during a home visit, or as part of an in-person or phone interview

If you're interested in ASQ:3 online through the CCRC call Jon Deavers at (440) 960-7187 ext. 247 and setup a meeting today. Or e-mail at [jdeavers@ccrcinc.com](mailto:jdeavers@ccrcinc.com) for more information.
